Electric Power Trouble Causes Suspension of Operations for Two Weeks.

For the third time during the present month the Tintic Smelting company was forced to close down its furnaces on Thursday as a result of the interference with operations through lack of electric power. The storm of Thursday played havoc with the current to an extent that the management decided not to run the farther risk of having both furnaces freeze up, and closed the plant down. Custom shippers, or some of them, at least, have been notified to cease shipping for the present, though the report from camp is to the effect that this order

will be only temporarily enforced.

It was stated at the plant last evening that the close-down would last for probably two weeks, or until the smelter's pewer plant has been connected up with the two electric power lines that are in future to supply the works with electric current.
The Tintic Smelting company announced

a short time ago that it was the intention not to rely altogether on one electric power company for current, while it was also be installed at the works. The diffi-

COPPER STOCKS IN BOSTON AND NEW YORK

Following is the daily market comment of Paire, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the with the range of prices of committee and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, by James A. Pollock & Co., and from which it is secured for use in this department of The Herald.

NSTALLING COMPRESSOR AT THE MINERAL FLAT

Fred C. Richmond returned from a trip Fred C. Richmond returned from a trip to the Mineral Flat company's property in the American Fork district yesterday morning. Mr. Richmond has commenced the installation of a water power com-pressor plant for this Jesse Knight prop-erty, but he was a little fearful during the day whether it was going to be pos-sible to complete the task before spring or not.

or not.

"There was a corking big snowstorm in American Fork canyon, Thursday," said Mr. Richmond, " and when I left camp in the evening six inches of the 'beautiful' covered the ground. This snow, on top of the rain that had previously fallen played havoc with the roads and I am not so sure that we shall be able to get all the material for the completion of the plant on the ground. If the weather will settle down and behave itself for a few weeks, the plant can be completed, but I want to tell you it looked and acted a good deal like winter up there yestera good deal like winter up there yester-

ican Fork district is a busy one and declares that mining men not familiar declares that mining men not familiar with what is going on in that district would be surprised if they were to make a trip through it. He was greatly surprised himself, notwithstanding the fact that he had a notion he was pretty well posted on the headway that was being made. He declares that American Fork is a district that is going to cut no small. is a district that is going to cut no small figure in the state's mineral production in the near future.

NEWSY BULLETINS

OVER POLLOCK WIRES

Boston wires: United States Smelting, Refining & Mining company declared its preferred stock and 1 per cent on its common stock. Dividends are payable Oct. 15.

New York wires: The exports of copper for the week ending Sept. 24 were 5,282 tons; since Sept. 1, 16.756 tons.

New York wires: All grades of copper advanced %c. Lake, 13%@13%; electrolytic, 13½@13%; casting, 12%@13%. Lead, \$4,47½@4.50.

Provo, Sept. 25.—The concentrates from the Lost Josephine mine, which were brought back by A. O. Smoot, have been assayed by Mr. Kroupa with the following result: 94 ounces gold and 503 ounces silver, which gives a value of \$2,256.10 to the ton.

The concentrates from which the above assay was made were taken from about seventy-five pans of dirt. There is some surprise that there should be so much silver as that is rather unusual. The mineral which the miners believed to be platinum appears to have been silver. Work will be prosecuted vigorously.

COPPER METAL MARKET IS A LITTLE TOP HEAVY

The president of one of the leading copper producers, according to the Boston News Bureau, says: "I have just returned from New York, where I made a rather exhaustive study into the copper situation. As a result I do not believe that the market at the present time would stand any very heavy selling of the metal if such selling were forced, but as all the larger selling interests are well sold through September and partially in October, there is no reason to anticipate any forced selling.

"I am told that the business of the brass manufacturers is showing a very

Tam told that the business of the brass manufacturers is showing a very satisfactory improvement, but that the electrical end of the business, which gave quite a pronounced spurt several months ago, showed only a false start, for the business has fallen off again. However, it is generally estimated that the consumption of copper in this country is in ousiness has failen off again. However,
it is generally estimated that the consumption of copper in this country is in the neighborhood of from 35,000,000 to 40,000,000 pounds per month, or from 75 to
10c per cent larger consumption than was the case the first part of the year.

"It is rather unfortunate that some of the large new producers could not have held off for six months longer, as this new copper from Bingham, Ely and Cananea, amounting to not far from 10,000,000 pounds per month, has undoubtedly been a considerable factor in causing production to run ahead of consumption and preventing a better price for the metal.

"The leading foreign interests in copper inform me that the foreign supply of the metal is no menace to the market, because of the way it is carried. It is well distributed and in strong hands, and is not held for speculation, but is fast going into consumption, as at the time most of this couper was nurchased for

the business interests should be able to get a line upon the future." SCOTTISH CHIEF IS NEARING THE CONTACT

going into consumption, as at the time most of this copper was purchased for-eign stocks were absolutely exhausted.

"On the whole, therefore, I look for a fairly steady copper market at between 13 and 14 cents until after election, when

A change is now taking place in the face of the long, deep tunnel that is being driven by the Scottish Chief company in the Park City district and General Manager Frank Harris is feeling a little elated as a result. Yesterday morning he received samples from the mine that were taken from the face of the tunnel Thursday. They consisted of a soft, easily broken quartzite that was highly mineralized, but whether the mineral was manganese or copper was hard to determine without an assay, which he exjected to get during the evening. At any rate, the rock shows that the mineral bearing zone is being entered and that the calculations of the management

that the calculations of the management are working out right.

The tunnel is now in a distance of something over 1,200 feet and face is approximately 1,100 feet below the surface. It was figured that the tunnel would have to be driven a distance of 1,340 feet to reach the lime hanging wall of the big contact lode. Men who know the ground state that after cutting through the state that, after cutting through the softer strata of quartzite now in evi-dence a rib of harder quartzite will be encountered and then will come the ore. Unless there has been a displacement of some kind to upset calculations, Manager Harris believes it will not be long until he has good news to report from the property, and a body of ore at 1,100 feet under the surface will be something worth talking about, sure enough.

RICH ASSAYS ON ORE FROM LOST JOSEPHINE

Work will be prosecuted vigorously on the mine all winter.

President Singleton and the other members of the board feel that there is no further question of the value of the property, and that with greater depth, when the levels of the old workings are reached, the gold will be taken out in quantities such as the Mexicans used to carry awar according to tradition and records.

AJAX DOWN TO BUSINESS IN FIRST-CLASS SHAPE

Manager Thomas Weir returned from a trip of inspection to the Ajax property yesterday morning. While there has been considerable to do in getting everything in working order since resumption at the property, he states that everything is now moving smoothly and that the month will close on a production of close to 200 tons "I have nothing in the way of strikes to report in the property," said Manager Weir, "but I can say that the mine is looking first rate and that the prospects

for the future are most encouraging."

DOINGS OF UNLISTED STOCKS ON EXCHANGE

East Crown Point sold at 2½c per share, Old American at 15c down to 13c and Utah Mine at \$1.55. This was the sum total of trading in the unlisted stocks.

Ely Witch was quoted at 35c asked, McDonald-Ely at 20c at 25c, Moscow at 40c bld. Ohio Copper \$3.12½ asked, Silver King Coalition at \$3.87½ asked, Talisman at 7c asked and Uintah Treasure Hill at 1336c at 15c.

Metal Market. Silver, 51%è per ounce. Copper (cathodes), 13 5-16c per pound. Lead, \$4.60 per 100 pounds.

Mining Notes.

Four carloads of ore from Utah mines were released from the Pioneer sampler Eight carloads of ore from Utah mines

were released from the Taylor & Brunton sampling works yesterday. Manager Tony Jacobson of several of the big properties at Afta states that for several days past he has been following a good streak of ore in the Columbus Extension property and he looks for it to develop into something big long before the objective point of the deep drift is reached.

Mines Manager L. S. Cates of the Boston Consolidated was in frem Bingham yesterday looking after matters on this end of the line. He states that while everything is booming at the mine and a large tonnage is being sent to the company's milling plant at Garfield, he still has room for a lot of good miners and
